custom made for **RESIDENTIAL** or **COMMERCIAL APPLICATIONS**

miyoutdoor.com.au

Be the envy of your friends, family and neighbours with a retractable or louvred roof system from MIY OUTDOOR.

Our stylish systems are fully customisable and can be designed to integrate with your existing space, allowing you to add value to your home and make the most of your outdoor space all year round!

RETRACTABLE ROOFS

Make the most of your outdoor space all year round with a retractable roof. At the touch of a button, you can open your patio roof for an alfresco lifestyle or close it for watertight protection from glare, heat, rain, wind, or cold.

Our advanced yet easy-to-use retractable roofs are custom-designed in Perth, combining the latest in European design, expert engineering, high-grade extruded aluminium and stainless steel components, durable and attractive fabrics, and a high-torque direct drive motor into one powerful package. Choose from a range of colours, and we'll work with architects, construction companies, engineers, and interior designers to create a stylish and practical pergola solution that perfectly meets your needs.

KEY FEATURES

- ✓ 100% watertight patio roof
- ✓ Wind rated to 117 km/h (the only limit is your imagination!)
- ✓ Strong and durable pergola
- ✓ Fast, smooth, effortless operation
- ✓ Superior materials, outstanding workmanship
- ✓ Optional guttering
- ✓ Option to customise with lights, misters and more (the only system on the market with this capability)
- ✓ Option to customise with lights, misters and more
- ✓ Commercial or residential

LOUVRED ROOFS

A louvred roof will add style and flexibility to your outdoor entertaining area. These energy efficient pergola solutions let you control the heating and cooling of your outdoor area at the touch of a button, by simply changing the angle of the blades.

Our custom made, quality louvred pergola will enhance your lifestyle and add value to your home. Reduce heating and cooling costs by opening the blades to let light and warmth in or close them for a welcome break from the sun or protect your outdoor entertaining area from the wind and rain.

All our louvred roofs are engineered to the highest standards of quality and workmanship. Made from top-grade aluminium, they're meticulously crafted to withstand Australian conditions.

KEY FEATURES

- ✓ Engineered to the highest quality standards
- ✓ Custom-designed pergola to suit individual requirements
- ✓ Weatherproof materials
- ✓ Aluminium profiles
- ✓ Blades span up to 4.5m wide
- ✓ Stylish aesthetics in a range of colours
- ✓ Internal gutter system
- ✓ Energy efficient
- ✓ Fast, unobtrusive opening and closing
- ✓ Lighting options available

Our range of high-quality outdoor blinds provide protection from the elements and increase privacy without compromising your view.

Specially designed and manufactured to handle the challenges of the Australian climate, they are a cost effective and practical solution to comfortable, year-round outdoor living.

Plus, all of our outdoor blinds are fully customisable. So, if you've got the space, we've got the solution!

CRANK & CLIP/STRAP

MIY Outdoor most versatile blind. Our go to blind for the more challenging install situations because of the simple yet functional design.

This blind is most commonly operated by a Manual crank system with detachable handle however it can also be motorised using a Somfy handheld or wall mounted remote where it is difficult to use the manual system.

Fixing points can be along the ground using stainless steel floor plates and straps or easy to use swivel clips on either side of the blind. This blind can also double as a "Roof to Fence" blind.

For example the blind could be fixed to your roofline and extend across to a boundary fence or wall providing shade and protection for plants, washing lines or a children's play area.

KEY FEATURES

- ✓ Engineered to the highest quality standards
- ✓ Custom-designed pergola to suit individual requirements
- ✓ Weatherproof materials
- ✓ Aluminium profiles
- ✓ Blades span up to 4.5m wide
- ✓ Stylish aesthetics in a range of colours
- ✓ Internal gutter system
- ✓ Energy efficient
- ✓ Fast, unobtrusive opening and closing
- ✓ Lighting options available

HEAVY DUTY CHANNEL

MIY Outdoor most popular product in the outdoor blind range, it is a stylish and strong system and is most commonly used in patios and alfresco areas of your home or business.

This blind can be operated by either a manual crank system with detachable handle or motorised using a Somfy handheld or wall mounted remote.

Guided by a 75mm x 3mm Gauge Aluminium Channel and secured using our very own reinforced aluminium bottom rail and pin locking system. The channels are a custom Retractable design allowing you to have multiple settings and maximum tension at all times. Spanning up to a maximum of 5.8m the HD blind is still our most reliable design.

Recommended to compliment the HD Channel blind is our extensive range of HVG Mesh Extra, Ultra and Ferrari Soltis Fabrics.

KEY FEATURES

- ✓ Huge range of fabric options
- ✓ Simple design is easy to use
- ✓ With or without Hooding/Pelmet
- ✓ Versatile
- ✓ Span up to 5.8m
- ✓ Manual or Motorised

WIRE GUIDE

A modern streamlined design used mostly as an external window shade but also an excellent option for balconies and where a channel is not desirable.

The Wire guided blind is most commonly operated with the Somfy remote system however it can still be used manually with a crank handle.

Guided by Stainless steel wires on either side of the bottom rail the blind can be set any desired level with no need to secure. However we do supply stainless steel clips if required.

Wire Guide blinds are great to keep the sun off the glass and dramatically reduce heat from our windows and house. They can be connected to sun sensors - so while you are at work they can be working at home to keep the heat out and reduce energy cost!

KEY FEATURES

- ✓ Span up to 5.6m
- ✓ Manual or motorised
- ✓ With or without hooding/pelmet
- ✓ Huge range of fabric options
- ✓ Reduce UV, heat & glare from glass
- ✓ Powder coated bottom rail
- ✓ 316 grade stainless brackets & components

ZIP SCREEN

If you are looking for a sleek, high-performance solution to enclose your patio or alfresco area, Zipscreen outdoor blinds offer the ultimate in protection and modern style.

These Australian-designed blinds feature a patented z-LOCK side track system that securely fastens the fabric to ensure zero gaps, providing total protection from insects, wind, and rain.

Engineered for endurance, the system uses precision-extruded aluminium and high-performance stainless steel bearings to ensure smooth, long-lasting operation. Zipscreen is ideal for large spans up to 7 meters wide and can be easily operated via a manual spring, crank, or a fully automated smart motor system for a clean, minimalist finish.

KEY FEATURES

- ✓ Australian designed and manufactured
- ✓ Spans up to 7 meters wide, with a 5 meter drop
- ✓ Slimline, modern outdoor blind design
- ✓ Durable engineering-grade aluminium frame
- ✓ Total insect and year-round weather protection
- ✓ Patented z-LOCK hidden fabric retention
- ✓ Spring, crank, or motorised options
- ✓ High-performance stainless steel bearings
- ✓ Wide range of standard and custom colours

FOLDING ARM AWNINGS

Experience the ultimate overhead protection from the sun with these retractable permanent shade options...perfect for courtyards, beer gardens, extending patio coverage and sheltering play area

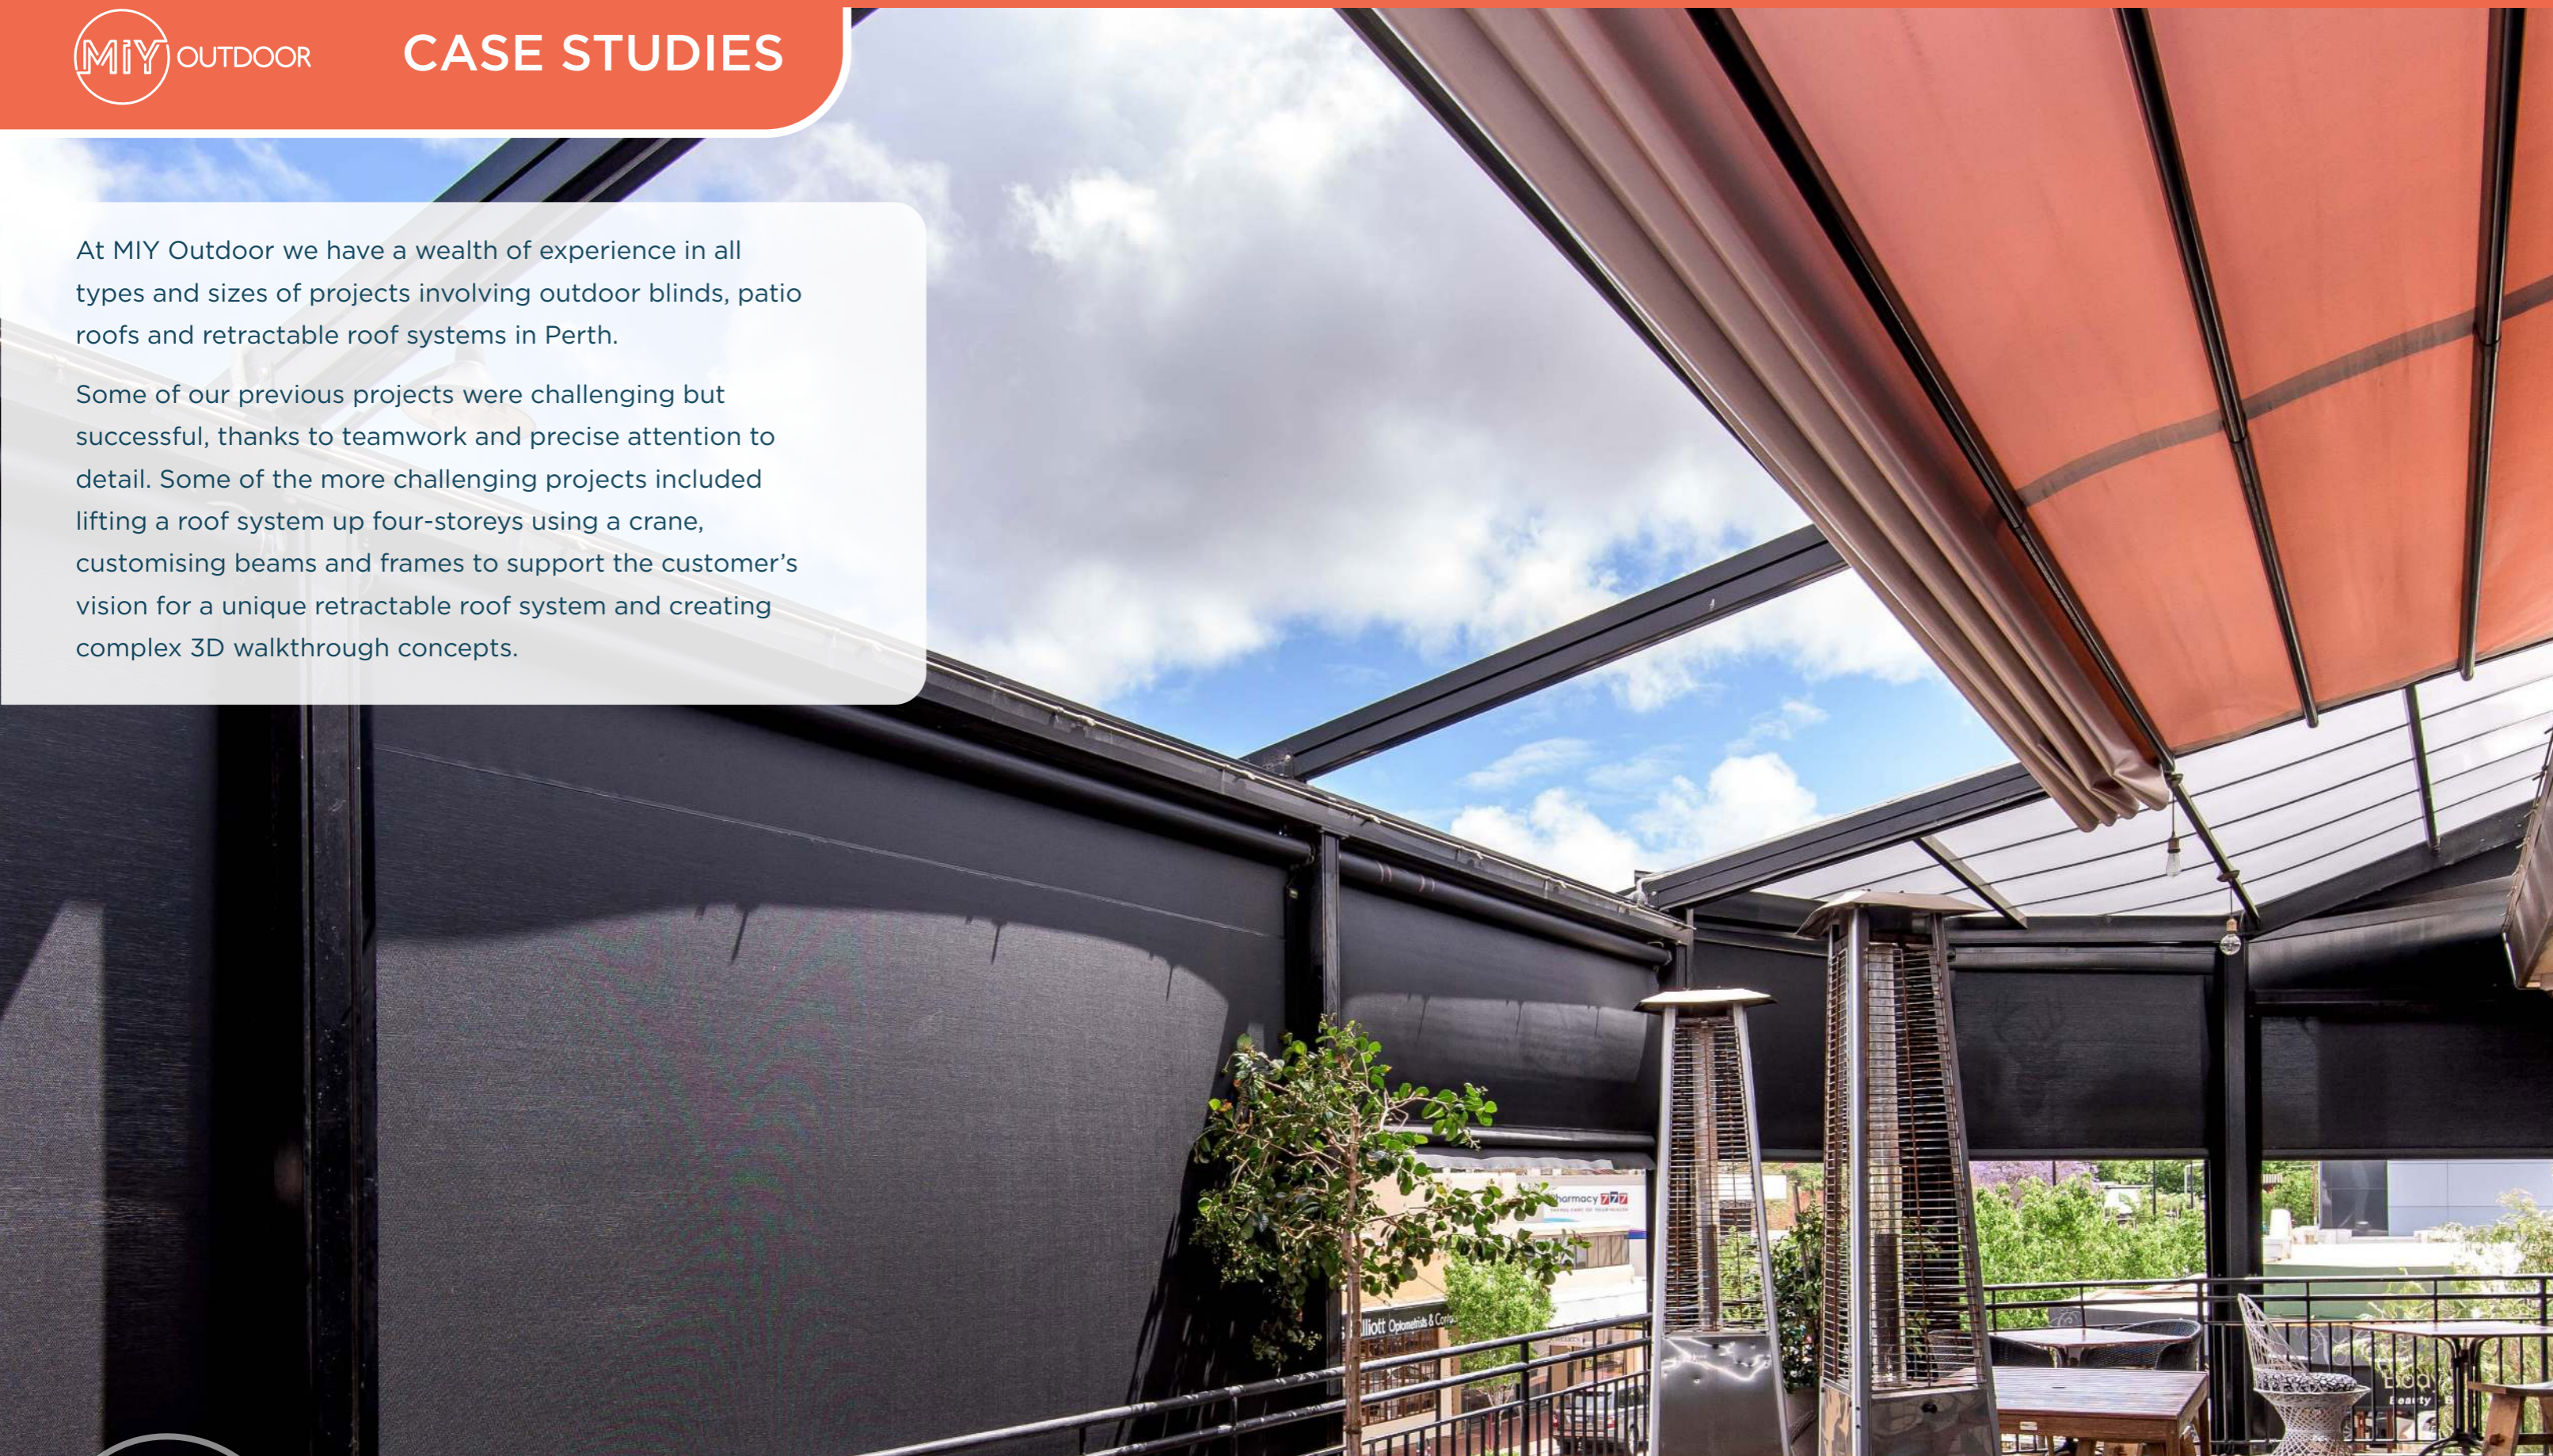

KEY FEATURES

- ✓ Protect your family from the sun's harsh UV rays
- ✓ Stylish and cost effective solutions
- ✓ Huge range of fabric choices
- ✓ Fully customisable
- ✓ Residential and commercial

At MIY Outdoor we have a wealth of experience in all types and sizes of projects involving outdoor blinds, patio roofs and retractable roof systems in Perth.

Some of our previous projects were challenging but successful, thanks to teamwork and precise attention to detail. Some of the more challenging projects included lifting a roof system up four-storeys using a crane, customising beams and frames to support the customer's vision for a unique retractable roof system and creating complex 3D walkthrough concepts.

THE REVELEY - ELIZABETH QUAY

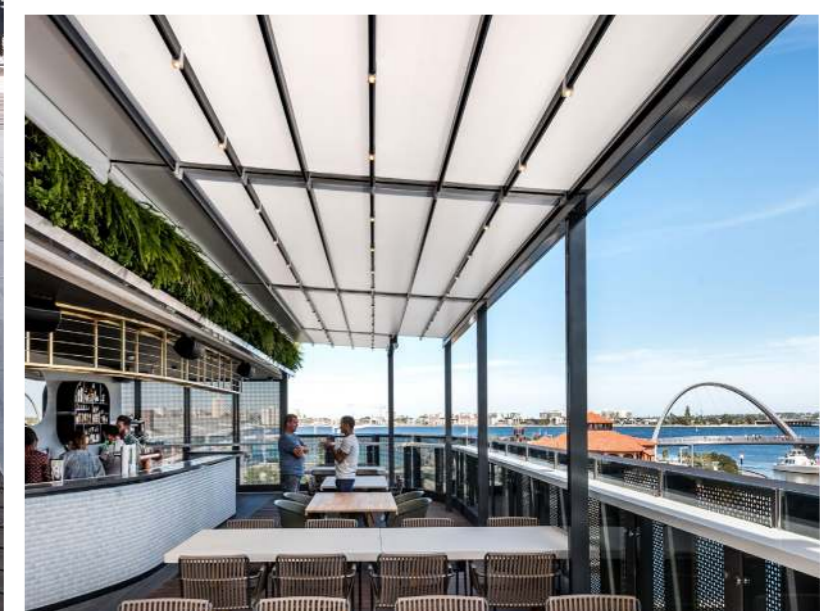

Elizabeth Quay is situated in the CBD next to the Swan River and features a large variety of new attractions such as boardwalks, public spaces, accommodation, and entertainment and dining options. The Reveley is Elizabeth Quay's first permanent venue, and with a prime waterside location and three-storey high rooftop, it offers incredible views of the city and river to its guests.

With the rooftop bar and its alfresco dining options being one of the Reveley's main attractions, the owner, Tim McLernon and his wife, wanted to ensure that the outdoor area can be comfortably enjoyed by their customers during any weather conditions and at any time of the day.

They chose our Perth team to install retractable roof systems and outdoor blinds for their rooftop. Although the clients knew which solutions they needed, this wasn't a simple project and the team at MIY Outdoor worked with the clients and their architects for a few months to create a suitable design and determine how many products they needed in the space, and in which blind design and colour choices.

A practical but stylish solution was agreed upon and we installed the Tera retractable roof system with front gutters and LED lighting above the rooftop area. The installation also included motorised slide-tracks with PVC clear materials. But the solution we are most proud of is the customised canopy that features a custom frame and fabric shells. This unique structure was specially designed for The Reveley by MIY Outdoor to fit and complement the unusual lines of the building.

This one-of-a-kind project took around two weeks to complete and The Reveley's customers can now enjoy their innovative food and impressive cocktails and drinks on the rooftop in comfort, and in any weather conditions. We are proud to say that the owners are incredibly happy with the end results and how well the colours, lighting and the finishes enhance their rooftop bar area. We will be collaborating with them again on new projects later this year.

UNIVERSAL BAR - NORTHBRIDGE

The Universal Bar, Northbridge, had an open-air bar area that was being under utilised, particularly during the winter months. They also wanted to be able to hold more functions, all year round. MIY Outdoor met with the Bar Manager and decided the Tera Retractable Roof System was the perfect solution for the space. It is fully waterproof and guttered and the The Universal have been extremely impressed with the transformation of the space since having it installed.

MASONMILL GARDENS - CARMEL

Here at MIY Outdoor, our team takes pride in providing innovative and state-of-the-art outdoor solutions to each of our clients, but in some cases we have to go the extra mile to ensure our product's design and function meet the client's requirements exactly. The installation of the retractable roof system at Masonmill Gardens and Restaurant's venue area was one such project.

Masonmill Gardens and Restaurant is a restaurant, and wedding and function venue situated 25 minutes from the Perth CBD. It is an impressive ten acres, with beautifully landscaped gardens which are surrounded by the Jarrah forest of Carmel. The venue, with its stylishly designed architecture, regularly hosts weddings and other special occasions, but is also popular with tourist and families who want to enjoy lunch or dinner in a gorgeous setting. It was clear from the start that the product MIY Outdoor chose to install for these clients had to be designed and customised to accompany this stylish environment perfectly.

The clients at Masonmill Gardens and Restaurant found MIY Outdoor on Google and after viewing our products and information online they contacted the MIY Outdoor Perth agency to request an outdoor shading solution for their events area, which is mainly used for functions and events. The clients had a fairly good idea of what they wanted to install in the area as they had seen a similar product in Europe. After surveying the area and considering all their requirements our team recommended that they install the Halo roof system. This is an outstanding product which features a curved structure as a striking and elegant design element. The Halo was the ideal product as it provided both beautiful form and function. Not only did the design suit the surrounding buildings and elegance of the venue, it also provided much needed shade and protection from the elements to the guests.

The project took around four days to complete - three days to install the retractable roof system and an additional day to fit mesh blinds around the area. The process was entirely hiccup free and the clients were extremely satisfied with our quality of workmanship and the end result.

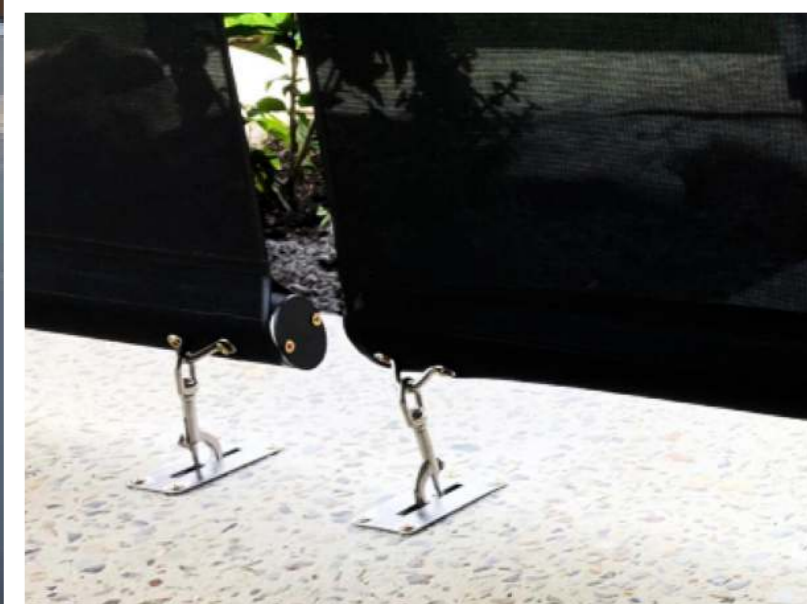

The DIY Awnings from MIY Outdoor provide a refined, yet approachable solution for creating stylish and functional shade in your outdoor space. Designed in Australia with custom sizing up to 12 metres wide and projections reaching 4.1 metres, they feature premium weather-resistant materials and come in both full and semi-cassette options for durability and aesthetic appeal.

Each kit is made with the DIY enthusiast in mind delivered ready for installation with detailed how-to videos, step-by-step instructions, and support from their expert team. Whether you opt for manual or motorised operation, the system allows you to transform your patio or alfresco area with premium finish quality, Australian-made standards and a five-year warranty for peace of mind.

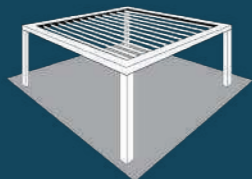

MIY Outdoor's DIY Outdoor Blinds bring together premium quality and home-friendly installation in one smart solution. Designed and manufactured in Australia, these blinds are tailored to the local climate with weather-resistant fabrics, powder-coated finishes and full support from the MIY team, making them ideal for patios, verandahs and alfresco spaces.

With custom sizing up to 5.8 metres in width, you can choose manual or motorised operation and select from a wide palette of colours and fabrics. MIY Outdoor also provides detailed how-to videos and ongoing support so you can measure and install with confidence all backed by a five-year warranty for peace of mind
